NAVEED AHMED

AI Engineer | Generative AI & Automation Specialist

Karachi, Pakistan | naveedsami5000@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

AI Engineer focused on developing production-oriented RAG applications and LLM-powered automation systems. Built four end-to-end projects featuring source-grounded retrieval, structured AI outputs, workflow orchestration, and enterprise API integrations.

TECHNICAL SKILLS

AI & LLM Engineering: Python, OpenAI API, LangChain, Prompt Engineering, Structured Outputs, RAG

Retrieval & Evaluation: Embeddings, Semantic Search, ChromaDB, Pinecone, RAGAS

Automation & Integration: n8n, Webhooks, REST APIs, Gmail API, DocuSign, HubSpot CRM

Backend & Infrastructure: FastAPI, PostgreSQL, Supabase, Docker, Git/GitHub

SELECTED AI ENGINEERING PROJECTS

Enterprise RAG Knowledge Assistant *Python, FastAPI, LangChain, OpenAI, ChromaDB, Docker*

- Developed a document-grounded AI assistant that ingests enterprise PDFs, generates vector embeddings, and retrieves relevant knowledge via semantic search.
- Implemented source-aware retrieval with document and page citations, structured API responses, and fallback handling for questions outside the knowledge base.
- Integrated RAGAS-based evaluation to measure retrieval relevance and answer faithfulness, and packaged the application with Docker.

Enterprise HR Onboarding & Document Automation *n8n, OpenAI, Supabase, DocuSign, Webhooks*

- Automated end-to-end candidate onboarding, from AI-powered resume extraction and database deduplication to contract generation and electronic signatures.
- Implemented webhook-based pause/resume execution for asynchronous signatures, followed by manager approval through Slack/Telegram.
- Added structured output validation, execution logging, and simulated IT provisioning to ensure reliable workflow processing.

AI Customer Support Email Gateway *n8n, OpenAI, Pinecone, Gmail API, RAG*

- Built an intelligent email pipeline that classifies incoming messages and routes support requests to a knowledge-grounded AI response system.
- Integrated Pinecone retrieval with confidence-based routing, automatically escalating insufficient-knowledge cases for human review.
- Preserved Gmail conversation threads using message identifiers and reply headers, with workflow-level error handling.

B2B Conversational Lead Qualification Agent *n8n, OpenAI, Telegram, HubSpot CRM, Webhooks*

- Developed a conversational AI agent that qualifies B2B inquiries using structured buyer and product classification.
- Engineered a four-branch decision matrix to reject unsuitable requests, prioritize high-value leads, and route qualified opportunities into HubSpot CRM.
- Implemented conversation-state tracking, contact deduplication, and conditional deal creation to prevent unnecessary CRM records.

EDUCATION

Bachelor of Science in Computer Science (BSCS) 2022-2025

Benazir Bhutto Shaheed University Lyari, Karachi

PROFESSIONAL TRAINING

Agentic AI One-Year Professional Training Program 2025-2026

Saylani Mass IT Training (SMIT)
